

Product Manager

Virufy Mission Statement: Our vision is to develop a smartphone app that can be used by everyone in the world to find out in seconds whether they have COVID-19. We are utilizing cutting-edge artificial intelligence technology to identify patterns undetectable by humans from the unique respiratory signatures of lungs damaged by the virus.

Job Description Overview: This person will work closely with the development team, define the product roadmap, manage development progress and align with stakeholders.

Responsibilities:

- Define Product roadmap and manage product backlog
- Analyze user needs and market conditions
- Work closely with the development team to communicate product requirements
- Prioritize tasks and ensure they're successfully achieved
- Develop, implement, and maintain production timelines
- Communicate with marketing team and external stakeholders

Experience:

- Previous experience in product management (including research or internship)
- Academic studies in Computer Science a plus
- Organized, collaborative, and detail-oriented
- Exceptional communication skills
- Strong sense of responsibility

Hours:

15+ hours per week
