AI Mentor

Role Overview

Our team of students works with machine learning, deep learning, and signal analysis for audio and video analysis in a medical setting. We welcome mentors with deep expertise that can guide us to build a robust solution as soon as possible.

Responsibilities

- Ensure that AI Engineers work according to the timeline.
- Ensure that the production code is clean and robust.
- Mentor students in group settings, e.g. over a Zoom call three times a week.
- Supervisory role in maintaining our robust AI systems in production.

Requirements

- Passionate and committed to the Virufy project mission.
- Deep experience building AI models on platforms such as Keras and TensorFlow.
- Demonstrated commitment to learning about AI through your own initiatives or through courses, books, or side projects.
- Hands-on programming experience working on enterprise products.

Time Commitment

5-10 hours per week

To Apply

Please fill out the [form](#) and feel free to reach out to join@virufy.org with any questions.
